AGRICULTURAL WHEELS

This catalogue is intended as a guide to cover the range of products supplied by OTR - Tyre Wheels Axles. Please contact our National Customer Service Centre 1300 CALL OTR for a current list price. All goods sold by OTR - Tyre Wheels Axles are covered by manufacturer's warranty.

Whilst all efforts have been made to publish this document with respect to accuracy supplied by manufacturers of products, OTR - Tyre Wheels Axles accepts no responsibility for claims resulting from information provided herein. All sales are covered by OTR - Tyre Wheels Axles Conditions of Sales and Credit Terms.

It is the responsibility of the purchaser to check all goods supplied by OTR - Tyre Wheels Axles at time of delivery. Errors in delivery must be reported to OTR - Tyre Wheels Axles Customer Service Department within 24 hours of receipt and any incorrect deliveries at the fault of OTR - Tyre Wheels Axles will be replaced by OTR - Tyre Wheels Axles without cost to the Dealer.

All goods returned outside these parameters shall be subject to a 10% surcharge and freight for returned goods shall be at the purchaser's cost. OTR - Tyre Wheels Axles return procedure must be followed otherwise goods will not be accepted.

WHEEL INFORMATION

OTR ENGINEERED LARGE DIAMETER RIMS, WHEELS & COMPONENTS

- **Use of specifically designed high-strength low-alloy material in crucial components**
Ensures maximum fatigue life.
- **Shot-peened lock ring groove and other high stress areas**
Provides favorable residual compressive stress in critical areas for long life.
- **Machined lock ring grooves and mating component surfaces**
Assures even stress distribution for maximum fatigue life and safety.
- **Machined o-ring grooves**
Provides positive sealing and air retention.
- **Periodic inspection of circumferential weld joints by X-Ray or Ultrasound**
World class quality assurance of submerged arc welds eliminates potential weld problems.
- **Use of ring rolled forgings**
Ensures maximum fatigue life.

ALL RIM TYPES COVERED IN THIS CATALOGUE CAN BE MADE INTO WHEELS

Information Required:

Operating Conditions

Maximum load, inflation pressure, speed, tyre size and ply rating.

Design Details

Bolt circle diameter, number of holes, bolt hole configuration (straight or countersink), hole diameter, bore size, disc thickness, disc location (offset), hub drawing (when available).

Note: Kits do not include tyres.

Step Down - Outer wheel is smaller & will only start to work as the inner sinks into the ground.

SD - Step Down Kits - A specification sheet showing the details of the existing inner wheel must be completed before a firm price can be given or work commenced.

Please specify required eye nut thread when ordering. Above list is a guide only. Kits are made to order to suit customers' needs. 400 Horsepower tractor maximum.

FITTING KING TRACK DUALS

1. Fitting of dual wheels is made simpler by driving the tractor wheel on to a block of wood. Do not position the tractor in a place where you may become trapped if the Dual Wheel falls over.

2. Plan the positioning of the eye nuts so that they are as evenly spaced around the wheel as possible.

5. Try a clamp and hook assembly as shown. Adjust the assembly length to fit. It may be necessary to cut the hook with a hacksaw if sufficient adjustment is not available (remember the adage - measure twice, cut once).

6. Adjust each assembly as shown to give a tight fit and positive over centre snap action. As the wheel draws into the taper it will be necessary to keep shortening the clamp assembly.

SAFETY

Dual wheels are not designed for road use and in many cases contravene the road traffic laws. Regularly check the clamp tension to ensure the wheel is securely attached. Dual wheels are heavy, do not put yourself in a position where you may be trapped if the wheel gets out of control, when either fitting or removing. Do realize the largest sizes can weigh in excess of half a ton.

If stored in an upright position, ensure that they are adequately secured. Do take care, the over centre action both when fastening and unfastening the clamp is very strong. Do not allow the handle to strike you.

OPERATION TIPS

The tyre pressure of the Dual Wheel should be about 2 PSI less than the

pressure in the tractor tyre. Excessive use of steering brakes increases loads on the dual and tractor wheels.

FITTING NOTES

1. The number of clamps supplied by us is adequate for the wheels size concerned. The number of clamps for each particular size of wheel is shown on our current price list. Comparison cannot be made with the number of fitting points used by our competitors as our fittings are far stronger than any others.

2. The number of eye nuts may not divide equally into the number of rim to disc bolts on the tractor wheel. This will not allow even spacing around the rim. Performance of the wheels will not be affected by uneven spacing.

3. Eye nuts are supplied in a wide

variety of threads. The eye nuts supplied to you will suit the rim to disc bolt normally used by the manufacturer of your tractor. Occasionally the tractor manufacturer will fit bolts with a thread different from their specified thread. Should this arise we will exchange the eye nuts or supply blank eye nuts.

4. Vehicles with welded in centre discs i.e. no rim to disc bolts must either have holes drilled through the disc or use special weld on eye nuts.

Drilling Providing the centre disc is flat or has only a shallow dish, then holes should be drilled equally spaced around the circumference, 1 1/2" in from the wheel rim. Bolts are placed through these holes and the eye nuts screw to these bolts.

3. Tighten the eye nuts as tightly as possible using a steel tommy bar over.

4. Roll the dual wheel alongside the tractor wheel. Enter the spacer band of the dual wheel into the taper section of the tractor wheel.

7. When the wheel is firmly into the bottom of the taper, the correct tension is produced by one man using full strength, only with the lever supplied, giving a strong over centre action. Now fit the 'R' clip locking pin.

8. During the first few hours work the wheels bed in and further tightening of the clamps will be necessary. Check the clamp tension regularly.

Welding Certain vehicles must use weld on eye nuts (JCB Fastrac); others with a deep dished disc will benefit from this method (MB Trac). Supplementary fitting instructions are available illustrating this method.

5. When using high speed vehicles with bolt in centres it is advisable to replace the rim to disc bolts with similar but longer bolts to allow the normal nut to be tightened to the correct torque. Then the OTR eye nut may be fitted to the remaining thread. These longer bolts must be grade 10.9.

6. It may be necessary to turn the rim to disc bolts around. If the bolt has either a square shank or a pip on the side of the head this should be ground off. This will not adversely affect the operation of the bolt.

7. On the Ford TW range of tractors it is possible to use the existing rail clamp bolts for fitting the eye nuts. Alternatively 3/4" UNG bolts may be fitted in existing holes in the centre casting in which case appropriate eye nuts should be ordered.

8. OTR Dual is designed so that torque is transmitted from the eye nut on the tractor wheel through the clamps to the power rail on the Dual Wheels. When torque is initially applied to the dual it will rotate slightly twisting the clamp assemblies out of square with the power rail. The claw part of the clamp is precision machined to a taper so that it jams on the power rail when out of square. Therefore, when the clamps appear to be attempting to rotate around the Dual Wheel the system is working

satisfactorily.

9. To remove the wheels from the tractor, drive the tractor onto a block thereby taking the weight off the Dual Wheel. Remove all but the uppermost clamp. Insert the tubular handle through the lowermost hole in the spacer band and lever off against the tractor wheel. Once the wheel is loose, remove the uppermost clamp and lever off through the other hole in the spacer band. Store the wheels safely and securely.

AGRICULTURAL TYRES

This catalogue is intended as a guide to cover the range of products supplied by OTR - Tyre Wheels Axles. Please contact our National Customer Service Centre 1300 CALL OTR for a current list price. All goods sold by OTR - Tyre Wheels Axles are covered by manufacturer's warranty.

Whilst all efforts have been made to publish this document with respect to accuracy supplied by manufacturers of products, OTR - Tyre Wheels Axles accepts no responsibility for claims resulting from information provided herein. All sales are covered by OTR - Tyre Wheels Axles Conditions of Sales and Credit Terms.

It is the responsibility of the purchaser to check all goods supplied by OTR - Tyre Wheels Axles at time of delivery. Errors in delivery must be reported to OTR - Tyre Wheels Axles Customer Service Department within 24 hours of receipt and any incorrect deliveries at the fault of OTR - Tyre Wheels Axles will be replaced by OTR - Tyre Wheels Axles without cost to the Dealer.

All goods returned outside these parameters shall be subject to a 10% surcharge and freight for returned goods shall be at the purchaser's cost. OTR - Tyre Wheels Axles return procedure must be followed otherwise goods will not be accepted.

TYRE BRANDS

TerraTyre is the culmination of over 100 years collective experience in supply tyres to the Australian Market. As an in-house brand of OTR, it contains over a decade of proven history on and off the Australian roads.

We pride ourselves on providing quality without breaking the bank. That quality comes from close relationship with Australian partners focusing on research and development. We maintain a large range of both truck and 4x4 tyres as well as products across various industries including mining, civil, transport and agricultura, which allows us to adapt to market demands.

GRI is a leading producer of specialty tyres in Sri Lanka with offices in 9 countries and sales in over 50 countries around the world. We produce high-performance agriculture, construction and material handling tyres.

GRI deliver high-grade specialty tyres that are built sustainably at their advanced production plants in Sri Lanka. Their state-of-the-art factory is the largest in Sri Lanka to produce specialty tyres and the first to produce radial agriculture tyres. Technological innovation, engineering strength and operational excellence have powered GRI through rapid growth to become a leader in specialty tyres.

With a reputation for high quality and made in America, Titan tyres help equipment take on some of the most challenging applications including farming, construction, mining and forestry. That's why they engineer, test and manufacture tyres for high durability and long-lasting reliability. They also give you options - offering full lines of both bias and radial tyres.

The result: you get the best return on your investment and can rest assured knowing that their tyres won't let you down. No matter the conditions, their tyres keep you moving.

Multistar is known as a specialist in tyres for the agricultural, mining and industrial sector for OTR applications, with an availability of a complete range of tyres. When you work with Multistar, you can depend on a diversified stock and high-quality tyres at competitive prices.

Their unique expertise and experience, combined with their excellent customer relations built up over more than 20 years form the basis for their leading position in the market. In addition, Multistar work together with suppliers such as Tianli, Linglong and BOTO all of whom are global major players.

Bridgestone understands the needs of Australian industries. In 1981, they became the first company in mining to sell directly to the customer. This direct-to-customer strategy gave them the unprecedented capability to understand their customer's business accurately and create a Solutions Driven offering built wholly around their needs.

Maximizing usage of a wide range of products, services and digital tools, they partners with customers to develop customised solutions that contribute to productivity improvement and cost optimisation in all operations.

Uniglory's collaboration with farmers starts from their passion of the earth. They understand not only the soil, but also the people who are ploughing it. Each product is carefully engineered keeping the latest technology in mind. These Agricultural products are strong enough to achieve your goals in all conditions, either in wet or dry soil, or on road. Specially designed for challenging applications, farmers can get the job done well and efficiently.

Uniglory aim to deliver superior value to the farmers, through their focus on innovation and technology.

Based in Qingdao, China, Marcher is one of the leading manufactures in the global Off-Highway tyre market. Founded in 1998, Marcher has built up a 93,000m² factory consisting of R&D departments and over a 62,000m² production plant in Qianlou Rubber Industrial Park.

Marcher have been operating in more than 100 countries and provide products to Rio Tinto & FMG in Australia. With all-for-durable and environmentally friendly design philosophy, Marcher is offering the most integrated production line for equipment in the agriculture, mining, construction and industrial sectors.

Do you work on a farm, as a crop producer or livestock rearer, in the timber industry, in a nursery or in the upkeep of green areas or perhaps in the world of viticulture or arboriculture? The experts from the Michelin group have been assisting all agricultural professionals for more than a century. They devote all their expertise, skills and innovation to the respect and protection of the soil.

Michelin help you to optimise your operating costs, particularly through fuel savings and to improve your crop yields while reducing soil compression and compaction.

While the group foundation dates back to the 1950s, BKT started its Off-Highway tyre business in 1987. For over 30 years, BKT has successfully focused on specialist segments such as agricultural, construction and industrial as well as earthmoving, port and mining, ATV and gardening applications.

But your business is at our core. Over the years we have come up with many tyre novelties that cater for the most demanding user needs in any Off-Highway application and today we offer an extensive product range of over 3,200 high-performance specialist tyres.

Growers have a legacy built on hard work and a spirit of innovation. It's the same vision that's driven Goodyear to engineer farm tyres for almost a century. Agricultural products in their OTR and Goodyear Farm Tire brands start with feedback that comes directly from the field.

It's how they developed the innovative LSW® (Low Sidewall) technology that's redefining expectations for agricultural tyres around the world. They offer a full lineup of agricultural tyres for a variety of equipment types - including tractors, combines, grain carts, and sprayers.

GROWING TOGETHER

MADE BY TITAN®

ACRONYMS OF AGRICULTURAL TYRES

As farm equipment manufacturers continue to introduce larger, heavier and more powerful equipment each year, the space in which to fit the tyre has not changed. This has necessitated that the tyre industry move toward new technologies that allow the same size tyre to carry heavier loads at lower inflation pressures. The result? **More tyre acronyms.**

	TRA TYRE & RIM ASSOCIATION	IF INCREASED FLEXION	VF VERY HIGH FLEXION	CFO CYCLICAL FIELD OPERATION	LSW® LOW SIDEWALL
Description	The standardizing body for the tyre, rim, valve & allied parts industry in the United States. Called for IF/VF/CFO being standard across all brands	Carries 20% higher loads at same inflation pressure as standard tyres or same loads at 20% lower inflation pressure as standard tyres.	Carries 40% higher loads at same inflation pressure as standard tyres or same loads at 40% lower inflation pressure as standard tyres.	Handles 55% higher loads when traveling less than 10 mph, for use on combines and grain carts.	Larger rim diameter than standard tyres, meets TRA standards for VF/CFO in terms of load/inflation capabilities.
Benefit		Reduces soil compaction when properly inflated.	Reduces soil compaction when properly inflated.	Reduces soil compaction & reduces need to adjust inflation during significant changes in weight during harvest.	Reduces soil compaction when properly inflated, minimizes road lope & power hop regardless of inflation pressures.
Caveats		Only effective if pressure is adequately maintained by application & weight, increased flex can cause problems with road lope & power hop quality if inflation is not maintained.	Only effective if pressure is adequately maintained by application & weight, increased flex can cause problems with road lope & power hop quality if inflation is not maintained.	Compaction reduction gains are only realized if proper inflation pressures are maintained.	Requires appropriate size of wheel.

L-2	Loader / Dozer Tyres	Standard Depth - Traction	Traction - Loaders (speed up to 10kph) - Soft / Sandy Conditions
L-3	Loader / Dozer Tyres	Standard Depth - Traction	Rock Design
L-4	Loader / Dozer Tyres	1.5 x Standard Depth - Traction	Rock Design - Additional Resistance & Life
L-5	Loader / Dozer Tyres	2.5 x Standard Depth - Traction	Rock Design - Ultimate Resistance & Life
L-5S	Loader / Dozer Tyres	2.5 x Standard Depth - Smooth	Smooth Design - Cut Chip Resistance in Rock Conditions

LOAD INDEX

The **Load Index (LI)** is the numerical number which corresponds to the maximum load a tyre can carry at the speed indicated by the **Speed Symbol (SS)**, under conditions of use specified by the manufacturer. The **Speed Symbol (SS)** indicates the maximum speed a tyre should travel with respect to the **Load Index (LI)**, under conditions specified by the manufacturer.

It is imperative - Do not exceed the maximum permitted speed of the tyre. Do not exceed the maximum permitted distance in one hour indicated in the tables of tyre's characteristics. At the time of fitting, it is vital that the various markings be verified, in order to be certain that the tyre is suitable for operation at the maximum allowed vehicle speed and load.

OTR TYRE WARRANTY

All tyre products imported by OTR are covered by Manufacturers warranty. As the qualification for warranty replacement varies with different suppliers, please consult with your local OTR Sales Representative for details and assistance.

Any other tyres purchased locally by OTR will be passed to the supplier for warranty consideration.

Any tyre that has a defect that affects the performance of the product which is deemed to be caused by materials used or the manufacturing process shall be deemed warrantable. Again, please consult your local OTR Sales Representative.

CONDITIONS & EXCLUSIONS

- Tyres less than 2mm tread depth shall be deemed to be worn out.
- Warranty only if tyre is deemed unusable because of materials used or manufacturer's process.
- In the event that the tyre is deemed warrantable by OTR - it shall be replaced with an equivalent tyre of the brand only being replaced.
- To the extent permitted by law, OTR and its distributors disclaims liability for downtime, damages, loss of vehicle use or inconvenience.
- It is the owner's responsibility to operate the tyres within the load/speed/pressures as specified by the manufacturer. It is the owner's responsibility to seek such information.
- This warranty policy applies only to new tyres:
 - The original purchaser of the tyre and is not transferable.
 - The original equipment that the tyre was originally fitted.
- All replacement tyres will be supplied only after the tyre is inspected and authorised by OTR.
- No tyres shall be supplied as "Pending Warranty Inspection"

EXAMPLES OF NON WARRANTABLE CONDITIONS

- Field or Road Hazards e.g. cuts, punctures, stubble damage, impact damage, tears/cuts in tread shoulder or sidewalls.
- Under inflation, overload or excessive speed abuse.
- Any repair or incorrect fitting of tyre.
- Vehicle defects including misalignment, worn mechanical parts.
- Mismatching of dual tyres or incorrect matching front to rear size differentials.

MADE IN AUSTRALIA

AGRICULTURAL AXLES

This catalogue is intended as a guide to cover the range of products supplied by OTR - Tyre Wheels Axles. Please contact our National Customer Service Centre 1300 CALL OTR for a current list price. All goods sold by OTR - Tyre Wheels Axles are covered by manufacturer's warranty.

Whilst all efforts have been made to publish this document with respect to accuracy supplied by manufacturers of products, OTR - Tyre Wheels Axles accepts no responsibility for claims resulting from information provided herein. All sales are covered by OTR - Tyre Wheels Axles Conditions of Sales and Credit Terms.

It is the responsibility of the purchaser to check all goods supplied by OTR - Tyre Wheels Axles at time of delivery. Errors in delivery must be reported to OTR - Tyre Wheels Axles Customer Service Department within 24 hours of receipt and any incorrect deliveries at the fault of OTR - Tyre Wheels Axles will be replaced by OTR - Tyre Wheels Axles without cost to the Dealer.

All goods returned outside these parameters shall be subject to a 10% surcharge and freight for returned goods shall be at the purchaser's cost. OTR - Tyre Wheels Axles return procedure must be followed otherwise goods will not be accepted.

PRODUCTS BUILT WITHOUT COMPROMISE

SPIDER STUB AXLES

Only one size available. 100mm square shaft with 5 spike spider type hub. Designed to use demountable 20" and 22.5" truck wheels with 28 degree mounting flange. Spider stub axle assembly will only accept dual wheels. Capacity per assembly is 6,000kg or 12,000kg for full axle.

DOUBLE SIDED STUB AXLES

This stub axle assembly was designed for a Castor wheel, where the axle protrudes on both sides of the hub. Mounting is done by an arm on both sides of the wheel (also referred to as a yoke). Capacities range from 500kg to 7,000kg, each 5 stud hubs to 10 stud on 335 PCD.

FULL AXLE

These are manufactured using a round or square shaft with hubs designed to suit your application. Hubs have high speed tapered roller bearings. Most of our axles are manufactured to European specifications, i.e: 5 on 140 PCD, 6 on 205 PCD, 8 on 275 PCD, 10 on 335 PCD, however specials can be accommodated. 3,000kg & above have triple lipped seals & bolt on caps.

Capacities: 1,000kg to 40,000kg **Shaft Size:** 39ø to 150ø | 40ø to 100ø **Axle Lengths:** Up to 5,000mm long

BRAKED STUB AXLES

Designed for agricultural applications. A stub or full axle with a drum brake attached to the hub, the backing plate which supports the brake shoes is welded to the axle. The brakes are operated by a cam lever (sometimes referred to as an S-Cam) which is mechanical and can be operated by cable, air or hydraulic cylinder. Hydraulic cylinder is most common as this can be operated by the tractor's hydraulics. Hydraulic cylinder to operate the brake is also available.

Capacities: 3t/axle to 30t/axle **Max Speed:** 30 km/h
Brake Drum Sizes: 250mm x 40mm to 406mm x 120mm

STUB AXLES

These are manufactured using a round or square shaft (usually short) with hubs designed to suit your application. Hubs have high speed tapered roller bearings. Standard range is to European specifications however some specials can be manufactured. 1,600kgs capacity and above have triple lipped seals bolt on caps with grease nipples. Stub axles are usually used where an extra long axle is required by placing a beam between them.

Capacities: 500kg to 20,000kg
Shaft Size: 39ø to 150ø | 40ø to 100ø

STEERABLE AXLE ASSEMBLIES

A short stub or full length axle complete with hub, including a vertical shaft (known as a King Pin) which allows the hub to pivot. Used for changing direction (steering).

Stub axles Available in 5 on 140 or 6 on 205

Full Axles Available in 5 on 140, 6 on 205 or 8 on 275

Self Steering Available in 10 on 335 PCD hubs

Capacities: 3 tonne to 7 tonne/PR

Capacities: Upto 7 tonne

Capacities: 20 tonne

Length: As required

Length: 3 metres

24, 30, 40 & 45 TONNE BALANCED SELF STEERING SUSPENSION

24, 30, 40 & the new 45 tonne self steering suspension. A wheel base of 2,000mm which will accommodate a range of wheel and tyre assemblies. The walking beam type suspension is ideal to distribute the load evenly, while the self-steering on the rear tyres offers great stability and maneuverability. Double action hydraulic cylinders are used to lock out for reversing, and the mounting channel is easily adapted to any chassis. Mechanical drum brakes can be added as an option.

Features & Benefits: Capacity of 24, 30, 40 & 45t at 25kph | Custom made | Superior quality reducing maintenance with higher safety | Walking beam distributes the load evenly | Mounting channel adapted to any chassis | Self steering for great maneuverability & tyre life | Double action cylinders lock during reversing | Increased service life & proven reliability.

For many years, throughout the world and Australia, OTR products have become the first choice of leading OEMs (Original Equipment Manufacturers) for mining, agricultural, construction, infrastructure, forestry and industrial companies.

OTR heavy duty parts and components are developed with one result in mind – to maximize the uptime of your work fleet. That's why we only supply the highest quality, innovative solutions tailored for your specific needs, and why we offer reduced manufacturing times compared to our competitors.

This is matched by OTR's comprehensive product support. Our Australia wide Service Centres, including our on-site capabilities, offer comprehensive on site inspections. All OTR maintenance, repair and replacement services are carried out by highly trained staff using the latest diagnostic tools.

Our work is guaranteed to meet the highest Australian standards and is backed by OTR's comprehensive global technical and logistical facilities. For added peace of mind, OTR offers an extensive warranty on parts and service. The bottom line is, by choosing OTR axles your vehicles will spend more time at work, less time in the workshop and be safer for your operators. At OTR - Tyres Wheels Axles we don't compromise, nor should you.

MANUFACTURER & DISTRIBUTOR OF WORLD'S TOUGHEST AXLES

Complete axle assemblies and spare parts range. Specialists in the agricultural market place, national supply of OEM's and aftermarket parts, experienced manufacturer and designer of quality controlled and endorsed products. Tailoring of product capabilities to suit any need.

SUPPORT AUSTRALIAN MANUFACTURING & BUY AUSTRALIAN

OTR proudly manufactures Australia's largest range of agricultural axles. These axles are manufactured in Australia to suit Australian conditions.

The range of components described in this catalogue is broad but not exhaustive and mostly shows our standard or "off-the-shelf" items. Specifications may vary from time to time as products are improved or new additions are made to our line-up to better serve you, the customer.

To assist you gather price and technical data we've introduced "Fastrack Enquiry" pages. Just copy these, send to us and we'll attend to your query promptly - mostly same day. Alternatively, call our technical department on **1300 CALL OTR**.

If you can't find the axle product you're looking for, chances are we can make it for you. Axles are our business from drawing board to prototype and finally to low or high volume production runs at the right price.

OTR'S WORLD CLASS CUSTOMER SERVICE

With nation wide Customer Service and Wheel and Rim Service Centres strategically positioned around Australia, OTR is able to provide a full product and technical support service. Our highly trained and knowledgeable staff and fully equipped Service Centres make testing, maintenance, service and part replacement quick and easy for fewer vehicle down time.

THE BENEFITS OF CHOOSING OTR AXLES INCLUDE:

- ✓ Manufactured in Australia to suit your performance priorities
- ✓ Capacity - 500kg to 20,000kg at 25kph
- ✓ Design flexibility - custom design and small runs
- ✓ Heavy duty design - increased service life and proven reliability
- ✓ Superior quality means reduced maintenance with higher safety margins
- ✓ Bolt on dust caps - superior protection against the Australian environment
- ✓ Triple lip seal - ensuring longer service life and easy maintenance

OTR - TYRES WHEELS AXLES SERVICE CENTRES OFFER:

- ✓ An extensive range of OTR Wheels, Rims, Axles and Tyres
- ✓ Tailoring of new components to suit individual needs
- ✓ Reduced manufacturing times compared to our competitors
- ✓ Repairs to OEM specifications
- ✓ Environmental accreditation
- ✓ Extensive Parts and Service Warranties on all products sold
- ✓ Quality controlled and endorsed products to Australian Standards - 4457.1 2007
- ✓ ISO 9001 - 2008

139.309.010	8 Tonne
139.948.010	10 - 12 Tonne

HEAVY LOADS, LOW SPEED ON UNEVEN TERRAIN

For use in agricultural/mining and forestry operations, or wherever heavy loads are required to be moved at low speed over uneven terrain. Walking beam assemblies can be manufactured in our factory to suit your application. Check technical department for sizes.

Ten tonne versions are typically fitted with:

- 11"x 19" 3 piece wheel (8 stud)
- 42"x 16"x 19" aircraft tyre for strength and resistance to puncture

Various tyre & wheel combinations are available.

500KG STUB AXLES

SPECIFICATIONS	
Part Numbers	033.711.010 033.746.010 (unassembled)
Model	AH20-HD
Capacity Each (Off-Road)	500kg at 40km/h
Capacity Each (On-Road)	500kg at 100km/h
Axle	39mm Round K1045
Hub	ASTM 65 - 45 - 12 Casting
Dust Cap (Screw-On With Grease Nipple)	180 Grey Iron
Bearings	Inner 67048/10 Journal 1.25" Outer 11949/10 Journal 0.75"
Seal (Off-Road)	4 Lips
Seal (On-Road)	2 Lips
Stud Patterns	HT Holden 5 on 41/4" PCD Ford 5 on 41/2" PCD

- Designed for the most arduous Australian agricultural conditions
- Reduced downtime
- Reduced servicing costs
- Increased reliability
- Heavy duty cast iron screw-on dust caps with grease nipple and 4-lip seal provide an effective dust/water barrier
- Eliminate bearing failure caused by lost press in dust caps or failed light duty seals
- Specifications subject to change without notice

SIDRA SUSPENSIONS

Dynamic Stability: The FAD ASSALI SIDRA® system is designed with the advantage of improved trailer handling characteristics, resulting in a unique driving experience, regardless of whether you are moving on or off-road. Thanks to the independent, interconnected set of hydraulic cylinders, the system is able to adapt instantaneously to the unevenness of the ground the vehicle is traveling onto.

Reduced Fuel Consumption: The limited amount of stresses transmitted to the tractor through the coupling allow for a smoother movement of the whole vehicle in the field. Less power is required from the tractor engine resulting in a reduced fuel consumption rate and a better driving feel. Ease of installation: one of the additional benefits of the system lies in its ease of installation. Just a few bolts are needed for the fixing onto the machine frame, ensuring a time and cost-saving assembly process

onto the final vehicle. Alternatively, the system can be easily welded into place.

Maximum Flexibility: All SIDRA® modules are equipped with either fixed or steering stub-axles and self - or forced steering systems, which can be easily combined for a single, tandem or tridem axle configuration trailer. Also available upon request are different track widths, which can be varied on demand according to the type of application and tyre used, and customised versions for special trailers.

Storage: Modules are palletized vertically so to occupy the least space possible, advantage both for transport and for storage by the customer.

A COMPLETE SUSPENSION SYSTEM

Consisting of a self-loading structure, braked stub-axles and hydraulic circuit. Available for load carrying capacities up to 14,000kg/module.

- Braked steel hubs stub axles homologated according to the EEC 71/320 regulation up to 105km/h
- Front axle lifting kit
- Additional accessories available upon request:
- Steering reverse motion locking system
- ABS and RDS options
- Nitrogen accumulators
- Locking valves

WALKING BEAM TAG TANDEM AGGREGATE BALANCERS

Available with 4 stub axles: 2 Fixed and 2 Self-Steering stub axles or 2 forced steering stub axles. Also available without brakes. Also available with different carrying capacities from those shown.

STEERING AXLES

WITH & WITHOUT BRAKES

Capacity: 5,500 - 18,000kg

Speed: Up to 80km/h

Available: On order for OEM users

SELF STEERING SUSPENSION

TA01522 - 24 tonne | **139.831.010** - 30 tonne
139.752.010 - 40 tonne | **140.007.010** - 45 tonne

- OTR's 24, 30, 40 and 45 tonne balanced self-steering suspension
- A wheel base of 2000mm which will accommodate 30.5 x 32 tyres
- Self-steering on the rear tyres offers great stability
- The walking beam type suspension is ideal to distribute the load evenly
- Double action hydraulic cylinders are used to lock out for reversing
- The mounting channel is easily adapted to any chassis
- Mechanical drum brakes can be added as an option
- For more details please contact OTR's customer service centre on **1300 CALL OTR**

BALL COUPLINGS

HEAVY DUTY AUTO LOCK

AUTO-LOCK couplings lock automatically when ball enters coupling jaws. All couplings come with a manual pin lock, which must be engaged prior to moving vehicle. If you are using a ball coupling for towing on Australian roads, it must be A.D.R. approved. OTR type SM300 and GP300 have been fully tested and certified by a Government approved testing authority. Couplings should be supplied with OTR tested steel balls - don't use substitutes. Non-original balls will void ADR62/02 approval.

ON-ROAD COUPLINGS

- 3 inch (76.2mm) ball couplings
- 2 types
- Use for on or off-road applications
- Approved & tested to ADR62/02
- Fully tested
- For full safety use manual pin lock
- Only complies with ADR's when used with OTR's approved matching steel balls

OTR AXLES, STUB AXLES & WHEELS

AXLE FEATURES & BENEFITS

SUPERIOR HEAVY DUTY AUSTRALIAN:

With increased service life, Designed to suit Australian climate and work environment and the ability to survive the harsh Australian farming/mining environment coupled with proven reliability.

HIGH QUALITY MATERIAL:

High quality product with long service life.

LARGE RANGE:

OTR provides design flexibility with a wide range of choice from 250kg to 40,000kg, the largest range in Australia and a full range of spare parts available.

FLEXIBLE PRODUCTION:

Allows for small runs of custom designs for OEM's to increased options and paired with prompt delivery.

BOLT ON CAST DUST CAPS:

Superior strength and protection against the harsh Australian environment.

TRIPLE LIP SEAL & WEARING RINGS:

60 - 150 series provides superior protection against the harsh Australian environment with longer service life and easy servicing for extended hub life.

COMPETITIVE PRICING:

Excellent value for money with lower production costs.

WHEEL FEATURES & BENEFITS

WORLDS LARGEST RANGE AVAILABLE:

4" - 63" diameter wheels available and servicing all the agricultural, industrial and mining industries.

LARGE RANGE OF OFF SHELF DESIGN:

Off the shelf designs provide for quick delivery and lower prices by offering a standard range of wheels.

FACILITIES WORLDWIDE:

Extensive manufacturing and testing facilities worldwide allow for an infinite range of standard and custom made designs. With quality product backed by vast technical support, OTR produce purpose designed wheels that give optimum strength and working life.

HIGH QUALITY MATERIALS:

Including heavy duty pressed centres containing high quality and high strength with safety, long service life, reduced down time and better reliability.

SPECIFICATIONS

Part Numbers	033.390.010
Model	SH 100
Capacity Each (Off-Road)	6 tonnes

DOUBLE SIDED HUB ASSEMBLIES

DS 08 DOUBLE SIDED

CAST HUB

PART NUMBER 033.737.010

Lightweight hub suitable for turf and garden care machinery such as mowers, trolleys, trailing wheels etc.

Stud patterns available include Ford and HT Holden. Hubs are designed to fit a 25mm axle that protrudes and can be supported on both sides of the hub. 2 Deep Groove ball bearings (6205-2RS) are used in the design.

Axles, studs and nuts are supplied as an option. The DS08 series is an economical alternative to other axle designs and is versatile in terms of application.

Note: A similar hub design (LCO Series) is also available in steel (weldable) versions. These are suitable for applications where hubs are mounted by welding directly to shafts etc. No bearings are supplied.

OFF ROAD ONLY FULL LENGTH AXLES

MADE TO ORDER - FOR AGRICULTURAL & INDUSTRIAL TRAILER APPLICATIONS

Choose from any of the stub axle sizes specified on page 66 of this catalogue to suit your full-length axle. Axles can be made from round or square material as required. **Note:** When choosing full-length axles for tandem/multi-axle applications, allow for a 20% decrease in load carrying capability. This allows for the increased loads caused by uneven terrain and turning.

This is a guide only. Consult your designing engineer for more detailed loadings.

WHEEL & AXLE FITMENT GUIDE

Manufacturers and distributors of Wheels & Rims for agricultural, industrial & mining machinery Axles, Stub Axles, Trailer components for on-road & off-road applications OTR has a large range of off-the-shelf wheels in-stock, suitable for our axles. However, special jobs require special wheels. OTR will design and build customised wheels for your requirements. Our huge range of rims and centre discs can be coupled together to suit your special application. Our facilities include CAD-CAM design stations. Over 30,000 rims in stock. Up to 3,000 tonne presses to form heavy duty centre discs. Large CNC machining and drilling machines ensure absolute accuracy. Robotic welding provides the ideal connection of centre disc to the rim. Crack testing and run out testing guarantee the quality and integrity of your wheels. OTR produce customised wheels for bus, truck, tractor, earthmoving and mining equipment, trailers, semi-trailers and agricultural implements. The above are standard sizes. There are many other sizes and fitments available. Please contact our technical department for more information on 1300 CALL OTR.

MINING & CONSTRUCTION

This catalogue is intended as a guide to cover the range of products supplied by OTR - Tyre Wheels Axles. Please contact our National Customer Service Centre 1300 CALL OTR for a current list price. All goods sold by OTR - Tyre Wheels Axles are covered by manufacturer's warranty.

Whilst all efforts have been made to publish this document with respect to accuracy supplied by manufacturers of products, OTR - Tyre Wheels Axles accepts no responsibility for claims resulting from information provided herein. All sales are covered by OTR - Tyre Wheels Axles Conditions of Sales and Credit Terms.

It is the responsibility of the purchaser to check all goods supplied by OTR - Tyre Wheels Axles at time of delivery. Errors in delivery must be reported to OTR - Tyre Wheels Axles Customer Service Department within 24 hours of receipt and any incorrect deliveries at the fault of OTR - Tyre Wheels Axles will be replaced by OTR - Tyre Wheels Axles without cost to the Dealer.

All goods returned outside these parameters shall be subject to a 10% surcharge and freight for returned goods shall be at the purchaser's cost. OTR - Tyre Wheels Axles return procedure must be followed otherwise goods will not be accepted.

WHEEL INFORMATION

OTR ENGINEERED LARGE DIAMETER RIMS, WHEELS & COMPONENTS

- **Use of specifically designed high-strength low-alloy material in crucial components**
Ensures maximum fatigue life.
- **Shot-peened lock ring groove and other high stress areas**
Provides favorable residual compressive stress in critical areas for long life.
- **Machined lock ring grooves and mating component surfaces**
Assures even stress distribution for maximum fatigue life and safety.
- **Machined o-ring grooves**
Provides positive sealing and air retention.
- **Periodic inspection of circumferential weld joints by X-Ray or Ultrasound**
World class quality assurance of submerged arc welds eliminates potential weld problems.
- **Use of ring rolled forgings**
Ensures maximum fatigue life.

ALL RIM TYPES COVERED IN THIS CATALOGUE CAN BE MADE INTO WHEELS

CUSTOM MANUFACTURING

OTR manufactures wheels and axles to meet clients specifications, be it for a tractor, a harvester, a dump truck or any other machinery that is used in Mining, Construction, Industrial, Agriculture and Earthmoving. When OTR sell the product, the relationship does not end there. On-site support is as important to us as it is to the customer. With tyres to suit the application and backed by an experienced sales & support team, OTR is there to keep you on the move.

OTR is the market leader in the design, development and manufacture of wheels to the 'off-highway' industry. Supplying the world's most respected original equipment manufacturers like Caterpillar, Volvo, Komatsu and Hitachi & Liebherr means that our product, service and delivery must consistently meet the high standards set by these companies.

In addition, OTR designs, develops and manufactures wheels for the agricultural, construction and mining industries. From earthmoving equipment, trucks and tractors to forklift and industrial vehicles, no mobile tyre problem is too big or too challenging. We will get your vehicles on the move again fast, minimizing downtime and maximizing the return on your tyre investments. OTR offers a complete range of wheels, from 6" through to 63" in diameter, including fixed welded wheels, adjustable bolted tractor wheels, demountable (spider mount) rim options and clipon dual applications.

Manufacturing capabilities are backed by the best wheel engineers, Customer Service Department and dedicated sales team all ensuring that components are manufactured to the highest standards and delivered on time. As a customer-focused and process-oriented company, no other wheel manufacturer can match our experience, capability, quality and design. Environmental accreditation along with attention to waste control is a reflection of our company values.

The wheel is the most integral part of a ground vehicle. Every aspect of design and development is unique for each application. By working with our customers we continually improve current designs and research technology to develop more effective products. Our in-house wheel and rim inspection, repair and certification services are performed by our fully qualified staff in accordance with AS:4457.1: 2007 and related standards in Western Australia (WA), Queensland (QLD), New South Wales (NSW) and Victoria (VIC).

CUSTOM MANUFACTURING MADE IN AUSTRALIA FOR AUSTRALIAN CONDITIONS

TESTING & REPAIRS

All wheel and rim inspections, repairs, modifications and manufacturing are in accordance with AS4457.1:2024 and all other referenced documents. OTR can supply a full service from simple repairs, through to supplying new wheels and components.

1. Wear assessment (NDT Inspection)

2. Back Grinding (Section Replacement)

3. Welding (Section Replacement)

4. Welding (Section Replacement)

5. Machining (Repair Preparation)

6. Wear assessment (NDT Inspection)

7. Workshop

8. Finished product.

ILR & DLR WHEELS & RIMS

THE QUICK CHANGE OPTIONS

OTR'S HEAVY DUTY QUICK CHANGE RIM SYSTEM FOR LARGE MINING TRUCKS

Compared to the standard fitment five-piece wheels and the Double Gutter seven-piece wheels currently offered, the OTR QCR System provides an increase Non-Destructive test interval periods, longer wheel life, improved safety through fewer wheel & component removal/install, resulting in faster tyre change outs and increased up time.

OTR offers the QCR System fitted to all six-wheel positions and is available for most makes and models of large mining trucks.

Traditionally, the only way to change the inside dual tyre on the rear axle of a large mining truck was to remove the outside wheel and tyre assembly. This process is time-consuming and downtime results in a loss of production. To overcome this, the DLR (Double Lock Ring) has the same diameter as inner rear dual wheel/rim. This allows the inner and outer tyres to be removed and replaced without the need for any of the rear wheel/rim bases to be removed, improving safety for tyre servicemen and reduced machine downtime which leads to increase productivity.

The DLR fitted to positions 3 & 6 consists of the wheel/rim base, two-bead seat bands, two-side flanges and two-lock rings, one of which is a 2pc design, whilst ILR (Integrated Lock Ring) used on positions 1,2 4 & 5 consists of the wheel/rim base, two-bead seat bands, two-side flanges and one-lock ring. The back section of the ILR wheel base has been modified to include an integrated lock ring and O-ring groove, this accommodates the addition of a second bead seat band which allows a tyre to be removed without the need for a hydraulic bead breaker tool to separate the inner tyre bead from the wheel base. As a safety feature, both the ILR and DLR wheels/rims have Sur-locs fitted to each of the Bead Seat Bands.

Additionally, the Mega Bore tyre

inflation system can be incorporated to allow even further reduction in tyre change time by reducing both the deflation and inflation periods. "The Mega Bore system increases the flow area by 2.46 times the current system" said Travis Parsons, General Manager - Sales.

The advantage of using an ILR wheel on positions 1,2 4 & 5 against standard five piece wheel is to allow all tyres positions to be easily rotated to other positions without having to remove or fit components, making tyre rotations faster and easier. When you combine the ILR and DLR across the machine the benefit of this combination saves time, increasing productivity and improves tyre servicemen safety with the reduction in repetitive tasks such as use of impact guns.

Savings can also be calculated by the simple fact that the wheels have not been removed from the truck, so re-torques are not required, increasing truck availability.

Field reports show a positive reaction by customers using the OTR QCR System on off-highway trucks. Customers using the OTR QCR System have reported significant

improvements in productivity by decreasing haul truck downtime for tyre servicing, while improving safety for the tyre service personnel. The difference between the standard rims and the OTR QCR System is significant on a mine site operation. In as little as 12 months, a customer can measure improvements in uptime of the haul truck fleet.

Customer tests indicate that by using the OTR QCR System, tyre servicing times can improve by greater than 50 percent, combined with improved service personnel safety standards and reduced occurrence of fatigue and injuries associated with tyre service job functions.

The increased productivity that comes from the OTR QCR System in both man power and moving dirt will comfortably increase profit within the first twelve months and then contribute to additional revenue for the remainder of their service life. OTR wheels & rims also have greater wheel life, lower maintenance costs and improve safety. The long term benefits to your profit speak for themselves.

SIX PIECE DESIGN OF AN OVM/SVM

"I have a penchant for quality and reliability, OTR provide me both and as such, I have developed a close working relationship with the guys at OTR - Tyres Wheels Axles."

**BRENTON LAWLESS
WUNGHNU,
VICTORIA**

"I was lucky enough to speak with the team at OTR - Tyres Wheels Axles. They were very helpful and assisted me greatly with the loading of the piece. I traveled home safely and very happy with what was held for me. I just wanted to say a big thank you."

**PAUL JOHNSON
MUSWELLBROOK,
NEW SOUTH WALES**

"The performance was as I expected of the tyre and more. The next FWD tractor I buy will defiantly be outfitted by OTR - Tyres Wheels Axles tyres."

**DARREN KEEFFE
MOORA,
WESTERN AUSTRALIA**

"Brenton went above and beyond to help us out. Without his help and service, we would have lost a day or 2 in the field, costing us precious time and more importantly money."

**HARRY JACKMANN
LOXTON,
SOUTH AUSTRALIA**

INDUSTRIAL COMPONENTS

This catalogue is intended as a guide to cover the range of products supplied by OTR - Tyre Wheels Axles. Please contact our National Customer Service Centre 1300 CALL OTR for a current list price. All goods sold by OTR - Tyre Wheels Axles are covered by manufacturer's warranty.

Whilst all efforts have been made to publish this document with respect to accuracy supplied by manufacturers of products, OTR - Tyre Wheels Axles accepts no responsibility for claims resulting from information provided herein. All sales are covered by OTR - Tyre Wheels Axles Conditions of Sales and Credit Terms.

It is the responsibility of the purchaser to check all goods supplied by OTR - Tyre Wheels Axles at time of delivery. Errors in delivery must be reported to OTR - Tyre Wheels Axles Customer Service Department within 24 hours of receipt and any incorrect deliveries at the fault of OTR - Tyre Wheels Axles will be replaced by OTR - Tyre Wheels Axles without cost to the Dealer.

All goods returned outside these parameters shall be subject to a 10% surcharge and freight for returned goods shall be at the purchaser's cost. OTR - Tyre Wheels Axles return procedure must be followed otherwise goods will not be accepted.

SLB HD VALVE EXTENSIONS

Heavy duty valve extensions to last the test of time. With the option to pre-fabricate to any length to suit large dump truck tyre valves & the ability to be unaffected by rock damage & last the lifetime of an EM rim, these valve extensions with developed hydraulic style crimp fitting to withstand pressure up to 2500PSI should be your first choice.

OTR ACCESSORIES

KOMATSU 830E-AC (OBELIX)

OTR designed and engineered a solution to the minimum dual spacing (MDS) issue on the Komatsu 830E-AC Haul truck to allow the fitment of the Michelin 50/80R57 XDR250.

This was brought about by the discovery in late 2015 that the MDS kit provided by Komatsu failed to meet minimum requirements of Michelin.

This solution was designed, engineered manufactured and delivered in less than 6 months and in 9 months 180 wheel assemblies had been delivered, allowing RTIO to rapidly deploy these tyres.

This has given RTIO the option to minimise the purchase of replacement rims, thus helping to minimise surplus inventory on site.

KOMATSU 830E & TEREX MT 4400 HD BACK SECTION

Design change implemented to address the premature failure of back sections on haul truck rims from component indexing.

Heavy Duty designed back section contact point after 12,000 hours of service at West Angelas was one of the hardest sites on back sections and the failure rate of the OEM rims was extremely high.

Long term result has seen a large reduction in required back section replacements over the OEM rims.

KOMATSU 930E-4 AT VERTICAL MOUNT

Design for fitment to positions 1, 2, 4 & 5 to complement the double gutter wheels on positions 3 & 6, allowing all tyres on the truck to be pre-fitted with dual bead seat bands for the life of the tyres.

This helped eliminate the need for any vertical bead breaking in the truck.

The rims and components supplied by OTR are 100% compatible with

KOMATSU 930E-4 AT DOUBLE GUTTER

Designed for fitment to positions 3 & 6, allowing all rear tyre positions to be changed without the need to remove wheels.

The rims and components supplied by OTR are 100% compatible with OEM equipment.

HEAVY DUTY 45" WHEELS

Designed to address the high failure rate of the 45" back section of wheel loader wheels from various PMO sites. This heavy duty back section has now become standard on all new wheels and all repairs requiring back section replacement.

Since the implementation there has been a large reduction in back sections requiring replacement.

VERTICAL MOUNT KOMATSU WA1200 WHEEL

Developed to assist in tyre changes on Komatsu WA1200 loaders running Michelin X-Mine D2 tyres which are restricted to having beads seated in horizontal position to reduce the possibility of 'hung beads'.

COMPONENT IDENTIFICATION GAUGE

OTR has designed and supplied a range of gauges to assist sites. Below are a list of some examples:

- Rim length go/no-go gauges for Komatsu 730 & 830 haul trucks.
- Rim inside diameter go/no-go gauges.
- Lock ring groove profile gauges.
- Lock ring/bead seat band angle gauges.
- Lock ring groove wear gauges for accurately assessing lock ring groove wear on radius's profiles (internal use only).
- Component compatibility gauges.

CLEAT JACKING BOLTS (INC NEW HITACHI EH5000)

Designed for removal of cleats from rear wheel ends on electric drive trucks these are specifically designed for each individual application.

Manufactured from grade 4340 HSLA material and Zinc plated for corrosion resistance.

AUSTRALIAN MANUFACTURED LETOURNEAU L2350 WHEEL

This is manufactured domestically, delivering a cost saving of 20% compared with the OEM wheel manufactured in the US.

It also allows additional manufacturing control for OTR to make minor design enhancements like the removal of troublesome valve protectors.

STEEL TRANSPORT FRAMES FOR WHEELS & COMPONENTS

Designed to safely transport large OTR wheels and quantities of components to and from site, they are double stackable to reduce freight costs.

Over 500 transport frames are currently in service.

LOCK RING RETAINING & SPREADER TOOL

Designed to improve the removal and re-fitment of the lock ring of inner positions on double gutter.

This is designed to increase safety and reduce fatigue for tyre fitters.

Available for use on 51" to 63" wheels.

COMPONENT FITTING STANDS

Designed to assist tyre fitters in the pre-fitment of components and/or tyres prior to bringing equipment out of production for tyre maintenance events.

This provides a significant benefit to production in minimising down time.

Designed to make the replacement of the gutter section cost effective and enhance reliability in the mounting disc/gutter section area.

Designed and supply for easier
fitment of lock rings to all positions
(lock ring contains no stored energy).

In conjunction with RTIO, Michelin, Titan-Yuxiang & Shanghai Transport University, the scope was to reduce weight of wheels and increase inflation pressures and payload.

OTR produced a special request to manufacture an aluminum cleat for use when fitting/pinning wheels to rear positions on Hitachi EH5000 haul trucks.

Designed to seamlessly fit the 830E haul truck, this bead breaker allows the tyre fitter to break the bead in a safe and time efficient manner.

Designed to assist in tyre changes on Caterpillar 993K loaders running Michelin X-Mine D2 Tyres which are restricted having beads seated in horizontal position to reduce the possibility of 'hung beads'.

Working with RTIO Off Site Repairs (OSR), collectively we have initiated and facilitated the tyre and wheel maintenance program.

The following items are also available from OTR's extensive range of products:
